Professional Summary

Data-driven Product Manager with 3+ years of experience driving product strategy, user growth, and revenue optimization in B2C and AI-powered platforms. Expert in translating complex data into actionable insights, leading cross-functional teams, and delivering products that achieve measurable business impact. Proven track record of launching subscription products with 200K+ paying users and implementing AI-powered solutions for interview automation and healthcare platforms.

Technical Expertise

Product Management	Product Strategy • Roadmap Development • PRD & User Stories • A/B Testing • Feature Prioritization • Competitive Analysis
Analytics & Data Tools	Google Analytics • Amplitude • Mixpanel • Power BI • Tableau • SQL • Python • R
AI/ML Technologies	LLM Prompt Engineering (ChatGPT, Claude) • OpenAI API • Computer Vision (OpenCV) • NLP
Statistical Analysis	Regression • Classification • Clustering • Time Series (SARIMA, Prophet) • PCA • SVM
PM Tools	Jira • ClickUp • Trello • Figma • Lucid • Miro
Development	Python • R • SQL • HTML • CSS • Bootstrap • MySQL
Domains	AI/ML Products • Recruitment Tech • Healthcare Tech • B2C Platforms • SaaS
Leadership	Cross-functional Team Leadership • Sprint Planning • Stakeholder Management • Agile/Scrum

Professional Experience

Product Analyst	Celloscope Limited, Dhaka	Aug 2025 to Present
- Leading product development for AI-powered interview platform (Kellafotey), designing automated scoring systems that evaluate candidates across 5 dimensions: resume-JD matching, content knowledge, communication, behavioral presentation, and cheat detection. - Developed master prompts for LLM-based question generation and scoring mechanism, achieving 85%+ accuracy in candidate evaluation with detailed evidence-based feedback. - Managing cross-functional teams across design, frontend, and backend development, coordinating sprint planning and milestone tracking via Jira for investor-facing POC delivery. - Driving product strategy for AI healthcare platform with prescription generation, voice transcription, and clinical workflow optimization for the Bangladesh market. - Conducting comprehensive competitor analysis and market research to inform product differentiation and investor pitch materials. - Facilitating stakeholder communication and regular investor presentations, translating technical progress into business value narratives.		
Product Analyst	Bdjobs.com Ltd, Dhaka	Mar 2023 to Jul 2025
- Led the B2C (Job Seeker) team, driving full product lifecycle from ideation to continuous improvement using data-driven decision making. - Successfully launched Bdjobs Pro, a premium subscription model, acquiring 200K+ unique paying subscribers and increasing monthly revenue by 15%. - Introduced and enhanced 40+ new features to existing products, resulting in 10% increase in DAU and 15% improvement in mobile app session time. - Led the successful execution of 10+ large-scale Job Fairs, optimizing product experience and driving significant user engagement.		

- Developed and monitored KPIs to evaluate product performance, conducting competitive analysis to identify market opportunities.
- Created impactful reports and presentations using data visualization to communicate findings and strategic recommendations to leadership.

Junior Instructor (Mathematics)

*Daffodil Polytechnic
Institute, Dhaka*

*Jun 2022 to
Feb 2023*

- Delivered mathematics curriculum to polytechnic students, developing structured lesson plans and assessment materials.
- Transitioned from teaching to data science and product management, applying analytical skills to technology career.

Key Projects

Nail the Interview - AI Interview Prep Platform *Founder & Developer* *2025 to Present*

- Built and launched a full-stack AI-powered interview preparation platform with three core modules: AI Mock Interview, Resume Analyzer, and ATS Resume Maker.
- Developed AI Mock Interview feature with live voice recognition, real-time AI feedback, and performance analysis across multiple evaluation metrics.
- Created Resume Analyzer tool providing ATS compatibility scoring, keyword optimization, and AI-powered improvement suggestions.
- Implemented ATS Resume Maker enabling users to transform resumes into ATS-optimized formats with multi-format export (PDF, Word, plain text).
- Designed privacy-first architecture ensuring all data processing happens locally on user devices.
- Tech Stack: Next.js, AI/LLM Integration, Voice Recognition APIs, PDF Processing.
- Live: nail-the-interview.vercel.app

Niramoy - AI Healthcare Platform *Product Manager*

*Nov 2025 to
Present*

- AI-powered healthcare platform featuring prescription generation, multi-language voice transcription (Bengali, Hindi, English), and clinical workflow optimization.
- Created problem statements for 7 AI POCs and developed comprehensive product development workflow framework using design thinking methodology.
- Coordinated multi-team API development and facilitated stakeholder communication across product, development, and business teams.

Kellafotey - AI Interview Platform *Product Manager*

*Aug 2025 to
Present*

- End-to-end AI-powered interview screening platform with automated candidate scoring, cheat detection, and hiring manager dashboard.
- Designed 4-dimension AI scoring system analyzing audio, video, and transcript data for comprehensive candidate evaluation.
- Developed master prompts for LLM-based question generation and scoring mechanism, achieving 85%+ accuracy in candidate assessment.
- Created hiring manager dashboard requirements with applicant tracking, bulk operations, and calendar integration for interview scheduling.

Bdjobs Pro - Premium Subscription Platform *Product Owner*

2023 to 2025

- Led end-to-end development of Bdjobs Pro, a premium subscription model for job seekers, from ideation to launch and continuous optimization.
- Acquired 200K+ unique paying subscribers, increasing monthly revenue by 15% and establishing a sustainable recurring revenue stream.
- Designed subscription tiers, pricing strategy, and premium feature set based on user journey analysis and behavioral data from existing user base.

- Implemented A/B testing for conversion optimization and monitored KPIs using Amplitude/Mixpanel to drive iterative improvements.
- Collaborated with engineering, design, and marketing teams to ensure seamless user experience and successful go-to-market execution.

Education

M.Sc. in Applied Statistics and Data Science *2022 to 2023*
Jahangirnagar University, Dhaka | GPA: 3.63/4.00

B.Sc. in Applied Mathematics *2017 to 2022*
Noakhali Science and Technology University, Noakhali | GPA: 3.06/4.00

Academic Projects

Bitcoin Price Prediction Using SARIMA and Prophet *MSc Project* *2023*

- Comparative analysis of time series models for cryptocurrency price forecasting using historical data (2018-2023).
- SARIMA outperformed Prophet (RMSE 5441 vs 27992), demonstrating superior accuracy in modeling trends and seasonality.

OMR Sheet Grading Using Image Processing *BSc Project* *2022*

- Developed computer vision solution using OpenCV for automated OMR sheet grading with real-time processing.
- Implemented edge detection, perspective wrapping, and answer matching algorithms with GUI interface.

Certifications

- AI Agents for Product Leaders
- Product Strategy Micro-Certification (PSC)TM
- Python for Everybody – Coursera
- Data Science with Python – Simplilearn
- Data Analysis using Python – IBM
- Data Visualization: Storytelling – LinkedIn Learning
- Data Science Math Skills – Coursera
- Using Databases with Python – Coursera
- Communication Strategies for a Virtual Age – Coursera
